

KONE MonoSpace® DX – Passenger Elevators

Design Freedom

Our KONE DX elevators can now handle increased elevator cab weight interior allowance, allowing you to create the look and feel of your elevator just the way you imagine it.

Space and Eco-efficiency

The KONE MonoSpace DX is a machine-room-less elevator with a hoistway footprint that is smaller than a traditional traction elevator that also requires no machine room, giving the owner more leasable space and architects more space to create better experiences for fans.

Optimized productivity during construction enables

KONE provides the necessary equipment for elevator installation (pit ladder, hoist beam) to minimize coordination with other trades.

Innovative Elevator Solutions for Stadiums

When it comes to stadiums, the KONE MonoSpace® 500 and 700 DX elevators deliver high quality performance and efficiency. Our state-of-the-art, machine-room-less design optimizes space and eco-efficiency, providing owners more leasable space and architects more space to create better experiences for fans.

Our elevators ensure fans are seamlessly transported to their seats, suites, VIP areas, and other key destinations with ease and comfort. With our elevators, you'll experience smooth, quiet rides and reliable, cutting-edge technology that enhances the user experience.
